We appreciate the enthusiastic contribution for the medical professionals involved, and hope that this study is effective in highlighting the pressures and issues facing the people who have diabetes, those who have it and don't know it, those who are at high risk of diabetes and the health professionals who treat them.

Thanks also to Catherine Leong and Kate Riley for assistance with the formatting of the report, to Sally Barnes and Charlotte Pong for their assistance with modeling the case studies and the scenarios (all of Pricewaterhousecoopers) and Kris Ericksen of Diabetes New Zealand Inc. for his research and networking
