

## Appendix A – List of Tables and Figures

Graph 1:	Cost Savings for Government-funded Services for People with Diabetes	iv
Table 1:	10 Key Diabetes Facts	2
Table 2:	Estimated Health Funding for Diabetes	7
Table 3:	Estimated Health Funding for Diabetes	8
Graph 2:	Increasing US Diabetes Deaths 1980 – 1996	11
Graph 3:	Estimates (1995) and predictions (2000 and 2025) of the absolute numbers of people with diabetes	12
Table 4:	Diagnosed Type 2 diabetes in New Zealand by Three Ethnic Groups	14
Table 5:	Prevalence of Type 2 diabetes and IGT in New Zealand – Diagnosed and Undiagnosed.	14
Table 6:	Prevalence of Type 2 diabetes, mid-1990s	15
Table 7:	Workforce Studies	15
Table 8:	Personal Items for People with Diabetes	18
Table 9:	Annual Public Health Expenditure and Health Education by the Ministry of Health 1996/97 to 1998/99	22
Table 10:	Proportion of Vote Health for Public Health	23
Table 11:	A framework for assessing cost effectiveness	30
Table 12:	Median age of diagnosis of Type 2 diabetes	36
Table 13:	Expected life expectancy at birth	37
Table 14:	Self-reported prevalence of blindness and cataracts in at least one eye of people with diabetes, undertaken in South Auckland	37
Table 15:	Risk Factors for Diabetes	38
Table 16:	Proportion of Adults who visited a GP at least once in 1997/98, by age and sex (source Ministry of Health)	39
Table 17:	Reasons for Adults’ most recent GP visit in 1997/98 by sex	39
Table 18:	Prevalence rates of complications in people with known diabetes by ethnicity	40
Table 19:	Complication rates of people with Type 1 and Type 2 diabetes in USA	40
Table 20:	Disability Adjusted Life Years (“DALYs”) lost by top 10 specific causes, 1996	41
Table 21:	Percentage reduction of the risk of diabetic complications shown in recent studies	42
Graph 4:	The age of new patients presenting for dialysis	53
Table 22:	Estimated average direct costs to the government of each person with known diabetes (includes health costs and social welfare costs)	54
Table 23:	Average annual cost of each person with IGT	56
Table 24:	Services which those with diagnosed diabetes are entitled to access in 2001	60
Table 25:	Access to Specialist Diabetes Nursing	61
Table 26:	Hours Specialists spend per week	63
Table 27:	Access to dietitians by people with diabetes	65
Table 28:	Access to podiatry services by people with diabetes	66
Table 29:	Comparisons of services for people with diabetes in New Zealand with recommended levels (British Diabetic Association)	67
Table 30:	Number of patients with severe complications in Scenario 1	67
Table 31:	Estimated total annual cost of Type 2 diabetes to Vote Health	68
Table 32:	Enhanced Services (Scenario 2)	70
Table 33:	Summary of literature that supports proactive services for people with diabetes	71
Table 34:	Number of patients with severe complications in scenario 2	73
Table 35:	Total Cost of Type 2 diabetes to Vote Health in Scenario 2	74
Table 36:	Spending on Prevention and Targeting Strategies in Scenario 2	74

Table 37:	Optimal services under Scenario 3	76
Table 38:	Evidence in support of Scenario 3	77
Table 39:	Number of patients with severe complications in Scenario 3	79
Table 40:	Total Annual Cost of Type 2 Diabetes to Vote Health in Scenario 3	80
Table 41:	Annual Spending on Prevention and Targeting Strategies in Scenario 3	80
Table 42:	Total Direct Medical Cost of Type 2 Diabetes	84
Graph 5:	Total Medical Cost of Type 2 Diabetes	85
Graph 6:	Patients with Complications	85
Graph 7:	Cost Savings to Vote Health	86
Graph 8:	Spending on Targeting, Public Health, Glucose Treatment, Research and Monitoring	87
